

Year 2 Knowledge Organiser

Unit: About Plants

Unit Lessons

- Understand that plants make their own food.
- Understand that plants need water, light, and a suitable temperature in order to grow well.
- Recognise the importance of flowers and seeds.
- Understand the difference between a bulb and a seed.
- Know how plants grow from a seed to a plant.
- Understand what plants need in order to thrive.

Did you know ?

Flowers are brightly coloured to attract insects, like bees, to the pollen.

Plants take both nutrients and water from the soil through the roots.

Many fruits and veg we eat, like apples and broccoli, actually come from the flower of the plant.

Greenhouses can be used to help grow plants, but the best place is out in the open air with real sunlight and rainfall.

GR8! – 8 words and meanings to learn

Key Word	Meaning
1. germinate	When a seed starts to grow.
2. nutrient	A food for plants which can be found in the soil.
3. produce	To make.
4. bulb	A rounded part of some plants that is under the ground.
5. seed	Produced for a plant to reproduce, these are tiny versions of a plant inside an outer casing.
6. fertilised	When the female ovule has been met by the male pollen, and produces a seed.
7. dormant	A stage during a life cycle where growth stops or slows, usually in colder weather.
8. pollen	Powder produced by the male part of the flower – it is transported to the female plant to produce new seeds.

What a plant needs...

to reproduce

to grow and be healthy
